

4 Years Old

Just like brushing your teeth, reading should be done everyday.

- Reading is important for success in school; success in school can lead to better overall success later in life.

Try It...

- When travelling, play an audio book and have children follow along with the book in their hands. Many libraries have collections of audio books.
- Have your child help make dinner and read the recipe card together.
- When reading a story, pause and ask your child questions. What will happen next? Who is their favourite character?
